PATENT WROUGHT NAILS.—These

NAILS are submitted to the notice of Builders, Contractors, and Ship-builders, as being superior to any others and cheaper. They have the toughness of the best hand-made nails, with far greater uniformity of make. The flat-pointed rose nails are particularly recommended wherever oak or other hard wood is used; being perfectly chisel-pointed, they require no boring, and will drive into the hardest wood without splitting it, and their heads being very strong do not fly off. The patent wrought nails may be had of all ironmongers. A stock of them is kept at the warehouses of the agents, HIGGS and GEORGE, Wholesale Ironmongers, 179, Borough, London.

THE CORRUGATED and GALVANIZED

IRON ROOF,

PORTABLE BUILDING, AND

NASMYTH'S PATENT FLOORING, ROOFING, AND GIRDER WORKS.

Offices, 63, Gracechurch-street.

JOHN WALKER, one of the Patentees of Corrugated Iron, calls the attention of Architects, Engineers, &c., to his List of Prices, which, consequently with good workmanship, are extremely low.

Models of the patent iron flooring, constructed of iron and girders; also, drawings of roofs, on peculiar principles, may be had on application.

Drawings of the iron lighthouse spoken of in the Times and other papers (see the Examiner for February 8th) may be seen by application.

References to firms of the highest class can be given.

NASMYTH'S PATENT

WROUGHT-IRON Fire-proof Flooring.

JOHN WALKER, Sole Manufacturer and Licensee.

Offices, 63, Gracechurch-street.

FIRE-PROOF FLOORS.

The late lamentable accident in Gracechurch-street serves to prove that where cast iron is the foundation on which floors, &c. are made, much dependence cannot be placed on it. This induces John Walker to earnestly solicit the attention and inspection of Architects, Engineers, &c. to Mr. N.'s NASMYTH'S PATENT FLOORING, of which J. W. is the sole licensee and manufacturer. The material is wrought iron, and therefore not subject to sudden fracture, as cast-iron is—and wood is not introduced.

Descriptive pamphlets may be had, models may be seen, and every information obtained, at JOHN WALKER'S OFFICES, 63, Gracechurch-street.

MANUFACTURER OF CORRUGATED IRON.

FIRE-PROOF CONSTRUCTION.—

The attention of those who are interested in building is invited to an improved method of constructing the FLOORS, CEILINGS, and ROOFS of Buildings, whereby they are rendered FIRE-PROOF, at a cost not exceeding that of the ordinary timber construction.

In this system timber joists are wholly superseded, their place being supplied by either wrought or cast iron, at the option of the parties adopting it; and the floors are formed by successive layers of incombustible materials, finishing with a boarded, cemented, or other surface. Any required degree of strength is readily obtained, and there is an entire freedom from the LATERAL THRUST, inseparable from the use of brick arches; security is also afforded from DRY-ROT, and from the ravages of insects and vermin.

The value and economy of this system have been fully proved by the extent to which it has already been adopted, and the great variety of buildings to which it has been applied. These include—

Private Mansions, [illegible], [illegible],
[illegible], [illegible], Schools & Theatres, [illegible],
Hospitals, Workhouses, and Lunatic Asylums,
Warehouses, [illegible], Mills, &c. &c.

A full description of this improved method of building and all further information in reference to it, may be obtained on application to the Proprietors of the Patent,

Messrs. FOX and BARRETT,
12, York-buildings, Adelphi, London,

Whose offices form part of a building erected upon this principle.

WIRE-CEILING.—SECURITY FROM

FIRE.—The newly-invented WIRE-CEILING is reduced in price to 2½d. per square foot. It has been successfully applied to two lunatic asylums. The Ceilings are yet entire, not a crack in them. There is neither contraction, expansion, nor absorption in the Wire, and it may be preserved by the mortar for a thousand years. It has been subjected to the severest test; the Wire has been bound round a thick deal stail, and every effort made by the strongest flame to produce ignition, without effect.
